

Our Title: Information Warfare and Cryptology Community

Our Membership

All Information Warfare Officers (AC/RC), all Cryptologic Technicians (AC/RC) , and Navy Civilians executing the Community's mission.

Our Vision

We are a community of war fighters who deliver information dominance to Naval and Joint commanders. We do so by applying the core skills of cryptology, signals intelligence, computer network operations, and electronic warfare. We will continue to lead in this game-changing warfare area across the Department of Defense.

Our Core Skills

Cryptology and signals intelligence, computer network operations (exploit, defend, attack) , and electronic warfare.

Our Mission

Execute the full spectrum of cyber, cryptology, signals intelligence, information operations, computer network operations, and electronic warfare missions. This occurs across the cyber, electromagnetic and space domains to deter and defeat aggression, to provide warning of intent, and to ensure freedom of action while achieving military objectives in and through cyberspace.

Our Seal
